

NetScore Loyalty Rewards

For NetSuite

NetScore Loyalty Rewards for NetSuite helps you better engage customers by offering them loyalty points and create a loyal customer base. This application rewards your customers on the website and in SuiteCommerce In store so that you can build better relationships and increase the customer's lifetime value to your business. It also drives brand awareness, reducing your cost of advertising, while helping you to increase sales.

A Flawless Reward Redemption Experience

NetScore Loyalty Rewards built with native integration to SuiteCommerce Advanced, SuiteCommerce Site Builder, NetSuite ERP and NetSuite SCIS Module (POS). However, NetScore can assist you in integrating the platform to other ecommerce and POS solutions that you might currently be leveraging as part of your NetSuite platform. Built as a NetSuite Native App, Loyalty Rewards automatically awards points to customers on their item purchases and allows them to instantly view their loyalty points balance at their convenience for future redemption. All this is processed in real-time with complete data visibility available across your entire enterprise.

" NetScore Loyalty Rewards for NetSuite is a very solid and well thought out solution compared to other loyalty apps we have used. It's flexible and can be customized to an extent and rewards customers for more than just spending money which builds on customer engagement. "

- Ben Thrower, FlexiTog
