

# NetScore Pick Slip Manager

For NetSuite

**NetScore Pick Slip Manager for NetSuite** provides the most effective and efficient way to fulfill the warehouse requirement of picking the right item in right quantity from the correct location. The solution facilitates an easy to print, reprint, void pick slip options and email notification for warehouse manager which reduces the overall manual effort required to generate the pick slips.

## Enhance your Fulfillment Process with Pick Slip Management Functionality

The application provides flexibility to process multiple sales orders for which the pick slip needs to be generated in bulk. A sales order can be selected based on different filters made available like customer name, location, ship date, etc. With this application, processing multiple sales orders for printing, reprinting and void/cancel pick slips becomes much easier and efficient.

*"As a Wholesale Distributor, the NetScore Pick Slip Manager has provided a solution that combines multiple warehousing processes into one form – the Pick Ticket. Our Warehouse and Traffic Manager can choose which Pick Tickets to print, either individually or in batch, based on a variety of criteria. This has streamlined several steps for us and reduced the need to print different sets of documents into one form."*

*- Vanessa Maliski, Industrial Paper Products Inc.*

## Benefits

### Reduces Overall Processing Time

Helps save overall processing time and makes the entire pick slip process more efficient through automation.

### Improves Tracking Accuracy

A system log maintains all activities related to the pick slip for future references.

### Improves Engagement with Customers

Helps in In-time stock picking and timely delivery to customers which improves your engagement with customers.

### Generates multiple Pick Slips at same time

Multiple pick slips can be printed/reprinted/voided in batches.

### Improves Engagement with Warehouse Manager

Pick Slips can be emailed to the warehouse manager by a simple click, thereby minimizing manual intervention.

## Features

### Works for Multi-warehouse System

Pick Slips can be generated for multi-warehouse systems and it considers only the available quantity.

### Facilitates Pick Slip Generation in Single and Batches

Pick Slips can be printed/reprinted/voided from a sales order. Also, can process multiple pick slips of different orders in batches.

### Send Email Notifications

Warehouse manager can be notified on pick slip print/reprint/void.

### Attach & print Additional Documents with Pick Slip

User can attach & print additional documents along with the pick slip, which will provide additional information to the warehouse manager.

### Maintains Pick Slip Log of Activities

Maintains log for all activities related to the pick slip such as pick slip print, reprint and void.

The screenshot shows the 'Print Pick Slip' interface with various filters and a table of pick slips. The filters include Sales Order, Customer, Location, Expected Ship Date (From/To), Pick Slip Number, and Printing Options. The table below lists the pick slips:

SELECT	SO DATE	TIME STAMP	PICK TICKET	SALES ORDER	CUSTOMER	SHIP TO ADDRESSEE	EXPECTED SHIP DATE	SO STATUS
<input type="checkbox"/>	7/3/2017	7/4/2017 4:15:00am		Sales Order #23556	120520 LabCrop Sourcing & Pro	LabCrop	7/5/2017	Pending Fulfillment
<input type="checkbox"/>	7/3/2017	7/4/2017 4:15:00am		Sales Order #23554	120165 Canfor	Canfor	7/5/2017	Pending Fulfillment
<input type="checkbox"/>	7/3/2017	7/4/2017 4:15:00am		Sales Order #23549	120872 XLC Services	XLC Services-Andy Stevens	7/10/2017	Pending Fulfillment

The screenshot shows the 'Pick Slip System Notes' interface with a table of system notes. The table below lists the system notes:
